

Quality

Accuracy

- Guaranteed 98% character-based accuracy when compared to voice file for word-for-word transcription
- Transcribed reports conform to the AAMT Book of Style
- Strictly Adhere to project specific requirements

Quality

- QA procedures utilize the AAMT scoring process
- Newly-assigned MTs are reviewed 100% for accuracy within our transcription platform, initial 30 day period
- After the minimum 30 days, reports are QA'd randomly based on a percentage factor not less than 10%.

American Transcription Solutions, Inc.
The reports you want. The solutions you need.

Security

Full HIPAA Compliance

- Transmission systems employ 256-key blowfish encryption with password protection
- Dedicated transcription facilities in Tulsa, Clearwater, Nashville and Orlando adhere to strict security procedures
- Use of VPN tunnel technology to connect from off site locations
- Doctor and patient confidentiality are assured.

Service

The evolution of medical transcription services in the healthcare industry is facing a revolution against poor quality, lack of control, ever increasing cost, billing nightmares, HIPAA compliancy, and the inability to meet turnaround times. Our mission at ATSI is to provide you with a service that will solve these problems once and for all. We are confident that you will find that ATSI can not only deliver transcribed reports on time and with the very highest quality, but also offers more services and options than any other transcription company today.

ATSI offers a full range of services that you will find satisfy your transcription needs, today and well into the future. You and your staff will receive your own, individual Login Ids and passwords—ensuring the safety and privacy of all reports. The ID allows you to print, fax, edit, and e-mail any completed documents from any internet enabled computer, not to mention you have full 24-hour access to this web-based software.

Technology

HL-7, RIS, & PACS Integration

ATSI is currently integrated with many HIS, PACS, RIS, and other health information systems utilizing HL-7 or proprietary interfaces. We believe that these systems greatly benefit modern day healthcare providers, but we know that it can be expensive to integrate new transcription software.

ATSI has another solution. When you begin your services with us, we will provide the integration for you at no additional charge!

FREE BI-Directional Interfaces

ATSI has a library of HL7- and most non-HL7 interfaces and feels that we can offer our prior knowledge and expertise without charging through the roof. We at ATSI ask "Why should you have to pay someone to allow them to be able to do business with you." In most cases we already have the interface written and are able to deploy them fully tested and ready to go within a two week window.
